

Visakh Vijayan

Full-Stack Developer

(vjnvisakh@gmail.com | Ph: +91-7980-544-891)

With over 8 years of hands-on experience as a software engineer, I have a strong track record of delivering innovative and reliable software solutions across dynamic projects. I've collaborated closely with clients, customers, and technical stakeholders, making me highly adaptable under pressure.

TECH STACK

1. Languages & frameworks — JavaScript, TypeScript, Node.js, Express, Next.js, React, NestJS, Golang, EJS
2. Databases & ORM — MongoDB, Mongoose, PostgreSQL, Prisma, Elasticsearch
3. Testing — Mocha, Unit & integration testing
4. Cloud & DevOps — AWS, Azure, GCP, Terraform, Docker, Kubernetes, CI/CD
5. AI & tooling — OpenAI, RAG, LangChain, Vector databases, Cursor, Claude Code
6. Also worked with — PHP, .NET, Python, Open edX, Payment gateways, Google Maps APIs, Tailwind CSS, Make.com

WORK EXPERIENCE (8+ years)

Unify Technologies, Hyderabad, India (Jun 2025 – Present)

1. Remus — Micro-investment app that makes spare-change investing simple for first-time users. Built for low friction, clear money flows, and UX that feels trustworthy on the very first screen.
2. [Unify Domains](#) — Domain search and registration platform with instant availability checks, WHOIS privacy, and global DNS—built for a clean, focused domain management experience without upsells.
3. LVPEI LMS — Large-scale learning platform on Open edX extended with a microservices architecture. Supports reliable course delivery, integrations, and independent deployment of services across enrollment peaks.
4. [SUMMIT](#) — Compliance management tool for chemical companies in regulated markets. Redesigned review workflows so teams can move through regulatory reports faster and surface violations with clearer UI/UX.
5. [Relaxx.AI](#) — AI-powered personal health assistant where OpenAI is wired into the frontend for real-time, conversational guidance. Focus on responsive UX, streaming flows, and integration patterns that make AI feel native to the product.
6. [Unify Trust](#) — Corporate website revamp for Unify Technologies—modernized marketing pages, service positioning, and client storytelling across digital engineering practices.
7. MyKula — A private community social platform connecting parents, educators, and local businesses.

Better Software, Bangalore, India (Oct 2021 – Mar 2025)

1. Nesh — Enterprise platform that ingests documents and lets users query them in natural language via OpenAI and NLP. Work spanned retrieval pipelines, grounded answers, and a frontend that surfaces trust and context.
2. Bionic — UI Engineer for a platform that allows automating contractual work for companies.
3. [The Pinch Life](#) — Team lead on a widely used facility-management SaaS in India. Coordinated delivery, unblocked engineers, and kept quality high for operations teams who rely on the platform every day.
4. SunLead — Team lead for a solar lead generation tool for the US markets.
5. [Recco Joy](#) — Team lead on recommendations, ad performance dashboards, and offer disbursement for businesses. Shipped tooling that helps brands measure campaigns and reward customers with clearer operational visibility.

SeenIt Online, Kolkata, India (Feb 2020 – Sep 2021)

1. StyleAde — Migrated StyleAde from PHP to the MERN stack and built vendor onboarding that connected luxury brand CRMs to low-latency B2C storefronts.
2. Search — Worked with Elasticsearch to improve the user search experience and faceted search.

Vawsum Schools, India (Oct 2016 – Jan 2020)

1. [Vawsum Payments](#) — School fee collection module and admin aggregator across multiple payment gateways. Replaced manual reconciliation with a single panel for schools and company ops to track every transaction type.
2. Vawme — A teaching assistant that allowed prescribing courses to students based on classes and curriculum.
3. Timetable integration — Integration of a 3rd party time-table generation software for classes, teacher assignment to free periods, and absent-teacher adjustments.
4. Enquiry — Admission inquiry using a Google Forms-type model with customised drag-and-drop forms for admissions, certificates, mark sheets, and more.
5. RFID attendance — Integrated RFID readers at schools to set up student attendance funnelled to parents as well.
6. Trakkerz — School bus tracking application using .NET services with Google Maps live view on the admin panel.
7. SMS module — SMS tracking panel for multiple vendors with easy switching and auto-prioritising based on load.

EDUCATION

1. MCA from National Institute of Technology, Jamshedpur (2014-2017) with CGPA 8.5.
2. B.Sc (Hons) Computer Science from JCC, Kolkata (2011-2014) with 70%.

PROJECTS

1. Dumpd! — Self-sustaining AI blog with automated content, cron publishing, and 100+ daily active users.
2. [Rolush Cafe](#) — Custom cake studio storefront with categories, cart checkout, and WhatsApp-led orders.
3. [Startup Stress Tester](#) — Load-testing tool for early-stage apps to surface latency and failure modes before production.
4. [AI Debator](#) — Multi-agent AI debate app with opposing viewpoints and turn-taking beyond single-chat UIs.
5. [Daily Motivation AI](#) — Minimal daily motivation app with scheduled AI-generated prompts, deployed on Vercel.
6. Check out more projects I'm working on at visakhvijayan.com
