Visakh Vijayan

Senior Full-Stack Engineer | Node.js • React • MongoDB • AWS • AI

vjnvisakh@gmail.com | +91-7980-544-891

Senior full-stack engineer with 8+ years building fintech, SaaS, healthtech, and edtech products. Strong in requirements research, technical documentation, client and stakeholder communication, team leadership, and shipping production systems with React, Node.js, TypeScript, MongoDB, PostgreSQL, AWS, and AI integrations.

Portfolio · LinkedIn · GitHub · Medium · LeetCode

SKILLS

1. Languages & frameworks — JavaScript, TypeScript, Node.js, Express, Next.js, React, Angular, NestJS
2. Databases & ORM — MongoDB, Mongoose, PostgreSQL, Prisma
3. Testing — Mocha
4. Cloud & DevOps — AWS, Terraform, Docker, Kubernetes
5. AI engineering & tooling — RAGs, LangChain, LangGraph, Model Context Protocol (MCP), Cursor, Claude Code

EDUCATION

1. MCA from National Institute of Technology, Jamshedpur (2014-2017) with CGPA 8.5.
2. B.Sc (Hons) Computer Science from JCC, Kolkata (2011-2014) with 70%.

WORK EXPERIENCE (8+ years)

Adesso India, Kochi, Kerala (Jul 2026 – Present)

Senior Associate

- Senior Associate at Adesso India (Kochi, Kerala) — contributing to software delivery and engineering across client engagements.

Unify Technologies, Hyderabad, India (Jun 2025 – Jun 2026)

Senior Software Engineer

- Remus — led technical research and end-to-end documentation for a spare-change micro-investment app; walked client stakeholders and engineering management through requirements, architecture, flows, and implementation details to align delivery.
- Unify Domains — full-stack engineer on a NameSilo domain-reseller platform; with product and QA, designed end-to-end reseller flows, coordinated integration with the NameSilo team, revamped UI for payment failures and Stripe/Razorpay escrow hold-and-authorize payments, and built an admin panel with a 360° view of purchases, renewals, and account activity.
- LVPEI — set up an Open edX LMS on a Kubernetes cluster with the DevOps team; dockerized platform components, learned new deployment tooling, and brought services online on k8s for institutional course delivery.
- SUMMIT — built a compliance dashboard UI from scratch (React, TypeScript); integrated Python backend compliance APIs with TanStack Query for caching, retries, and preserved client state across regulated reporting and violation-detection workflows.
- Relaxx.AI — built a ChatGPT/OpenAI wrapper that lets users upload patient prescriptions, generates structured medical reports, and supports conversational voice interaction with preserved session context.
- MyKula — full-stack engineer on a social platform for educators, students, and parents; built NestJS backend and React frontend for community features and engagement.
- Unify marketing web — contributed to company website revamps across Unify properties.

Better Software, Bangalore, India (Oct 2021 – Mar 2025)

Senior Software Engineer

- The Pinch Life — team lead for a 3-engineer squad on a facility-management SaaS in India; gathered requirements with clients, owned sprint planning and prioritization, and delivered features used daily by operations teams.
- Recco Joy — backend owner for a closed social platform surfacing nearby product recommendations from a user's nearest circle (Node.js, APIs, data models).

- SunLead — backend engineer on a US-focused solar lead-generation product (Node.js, APIs, data pipelines).
- Nesh — backend engineer on a multi-engineer team building a Q&A platform for chemical sales companies; ingested product documents into company repositories so sales teams could ask questions and get grounded answers to support deals (OpenAI, NLP).
- Bionic — UI engineer for enterprise contractual workflow automation.

SeenIt Online, Kolkata, India (Feb 2020 – Sep 2021)

Senior Software Engineer

- SeenIt — owned backend APIs for a new iOS app enabling recommended dress collections—supporting creation, surfacing, and collection workflows for the mobile experience.
- Rebuilt product search from scratch in Elasticsearch with Amazon-style left-side filters and faceted catalog browse for faster, filter-driven discovery.

Vawsum Schools, India (Oct 2017 – Jan 2020)

Software Engineer

- Vawsum — single-handedly introduced the school fee payments module, replacing an all-manual fee collection process; delivered backend and mobile integration across payment gateways and trained parents and school stakeholders on digital payments.
- Built Vawme (course prescription), drag-and-drop enquiry/forms for admissions and certificates, and timetable integrations.
- RFID attendance — visited each school on-site to demo the rollout; delivered mobile app attendance, parent-facing updates, and backend reporting for school admins.
- Trakkerz — integrated bus tracking with Google Maps live view (.NET services).
- SMS vendor platform — built failsafe routing across multiple SMS vendors with automatic rerouting on failure or heavy load; delivered sent/delivered reporting and a Google Chrome extension for company-wide vendor balance tracking.

PROJECTS

SNo	Project Name	Project Description	Tech Stack used
1	Dumpd! – AI-Powered Content Management Platform	MCP-powered publishing for AI assistants—creator dashboard, drafts, and public /username blogs.	Next.js, TypeScript, MCP, Google OAuth, Markdown, Vercel
2	PDF RAG – Self-Hosted Retrieval-Augmented Generation System	Self-hosted PDF Q&A with semantic search, cited answers, and health-checked microservices.	Docker Compose, Qdrant, RAG, Node.js, React, PDF, Vector search
3	iDent Dental – Healthcare Website & Appointment Platform	Dental clinic site with appointment booking, doctor profiles, testimonials, and SEO.	Next.js, TypeScript, React, Tailwind CSS, Vercel, S3, CloudFront, Certificate Manager, IAM
4	QuizPrep – AI Quiz Generation Platform	AI quiz platform for interview prep and educators with sharing and attempt tracking.	Next.js, TypeScript, React, Tailwind CSS, OpenAI, Vercel
5	AI Debator – Multi-Agent LLM Debate Application	Multi-agent debate app with opposing viewpoints, turn-taking, and orchestration.	Next.js, OpenAI, TypeScript
